

→ Envision Refrigerated Vending Machine

Simplify Asset Management and Access Control for Complex Vending

The Envision refrigerated vending machine simplifies dispensing a diverse range of products with a flexible coil dispensing system and easy-to-configure trays. This vending machine keeps perishable items fresh with an energy-efficient R-290 refrigerant and insulated cabinet. The back-lit braille keypad makes item selection easy. Connect seamlessly to our VN Cloud software for remote monitoring and easy vending management.
