

→ Convenient Harm Reduction Product Dispensing

Promote Public Health and Prevent Access Barriers

Public health officials can ensure secure and dependable delivery of health care supplies and products such as Narcan or COVID-19 antigen home test kits with harm reduction vending machines and dispensing solutions. With over 20 years of experience, our harm reduction vending machines are among the most mature and adaptable in the market.

One Deployment

1,000 Reversed Overdoses

Increase Public Health

Better access to products reduces overdoses and other adverse health outcomes

Reduce Access Barriers

Offer convenient access to harm reduction products at additional locations

Compliance Proof

Easily track data and generate reports to provide evidence of compliance regulations

Targeted Distribution

User ID allows for consumption regulation with the ability to establish timeframes for distribution

→ Convenient Harm Reduction Product Dispensing
