# Secure Critical Gear: IFAK Kits, Leave- Behinds, and More

Our dispensing machines and smart lockers are proven to help police and law enforcement manage leave-behinds such as Narcan, personal first aid kits (IFAKs), and tactical gear like handcuffs and body armor. They also secure track evidence and control access to critical assets such as ammunition, PPE, trauma kits, and more. When time and security are of the essence, rely on VendNovation.

Cost Savings  
**Up to 30%**

### Staff Efficiency

Provide access to critical supplies where they're needed most, for officers who need them most

### Cloud-Based System

Easily manage your locker or dispensing machine from any smart device without software installation

### Cost Reduction

Minimize supply costs, waste, and administrative overhead with automated inventory control

### Security

Secure law enforcement supplies in locked, tamper-resistant vending machines and smart lockers

### Reliable Access

From securing evidence to storing trauma kits, enjoy easy, reliable access to all machines

### Automated Alerts

Eliminate out of stock challenges with product alerts set to individual par levels, while also monitoring machine health
