VendNovation

Upgrade Your Vending Machines Without Replacing Them

Tired of Outdated Vending Machines & Clunky Web Services?

Many companies with automated dispensing machines, lockers, or vending machines struggle with outdated systems that offer cumbersome web services, limited support, and no integration capabilities. At VendNovation, our conversion kit seamlessly transforms old machines into modern, fully supported units. Our solutions integrate effortlessly with your existing operations, offering accurate data, robust support, and user-friendly interfaces, while eliminating the headaches of outdated systems or discontinued services.

Cost Savings

No need for new hardware—upgrade your existing machines without buying entirely new units. Our conversion kit maximizes the life of your current equipment, saving you thousands in replacement costs. Plus, faster setup and seamless integration mean less downtime.

Increased Uptime Rates

Keep your machines running longer with fewer interruptions. VendNovation modernizes outdated systems, reducing errors, maintenance needs, and downtime for more reliable operations, consistent service for users, and maximized revenue potential.

Full Library of APIs

Unlock the full potential of your machines with a complete library of APIs. Seamlessly integrate your vending, locker, or dispensing systems with existing software, employee badge systems, and inventory tools to give you real-time data, automation, and complete control.

Sustainability

By extending the life of existing hardware, you reduce waste. Upgrading your machines leads to fewer discarded units, a smaller environmental footprint, and a more eco-friendly approach to modernizing your operations without sacrificing performance.

Power Your Machines with Smarter, Faster & More Reliable Tools

Upgrade your machines to streamline operations, get real-time insights, and access expert support whenever you need it.
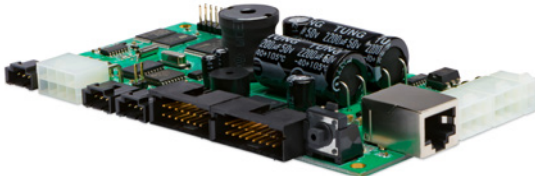

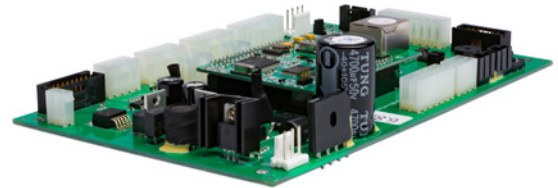

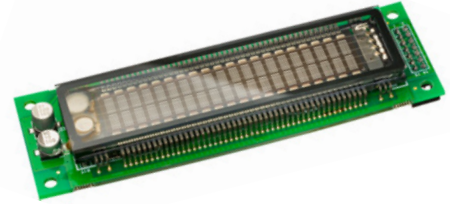

Optimize Every Shelf, Every Time

Real-time data on stock levels helps prevent shortages or overstock, keeping your machines running efficiently. With precise tracking, you can make smarter restocking decisions, reduce waste, and ensure customers always find what they need.

Expert Help, Anytime You Need It

Unlimited phone support from 7am - 7pm PST, and online training ensures your team always has the help they need. From troubleshooting issues to getting the most out of your upgraded machines, our dedicated support keeps your operations running smoothly and efficiently.

Turn Data Into Actionable Decisions

More robust automated reporting and alert generation give you complete visibility into your operations. Track sales, inventory, and machine performance in real time, identify issues before they become problems, and make data-driven decisions.

See How Easy Upgrading Can Be

Discover how our conversion kit can transform your old machines into modern, fully supported systems. Experience the power of upgraded technology, smarter operations, and smoother workflows—all from the machines you already own.
